JAMES F ROBINSON

selected diary pages from 2000- 2007

I wanted to share some of my automatic spirit dribble, pen doodles in this booklet, taken from 9 diaries over the past 7 years. Doodling is both a compulsive form of internally working out my own head and premeditated graphic joy. I reckon doodling is essential to some human psychological internal dream stain-outloud.

Like when you're on the phone to grandma and she's telling ya about comparative catfood prices citywide...you just have to doodle!

I think because doodling is so normal, something we take for granted, something that happens when we half-aware..but then a subconscious reality sneaks in there like mirror flashes of undercurrent as obvious as up or down or me and you..even if we're only half-listening ..we could fly in the dream if we were more aware. and blue pills and rabbit holes quarks and home invasions telephone boxes toto long way from aslan gandalf my best tax accountant karma bank..helluluya!

Also for me they are literally the story building blocks of themes and states in my other work. binary I'll footfalls in the hallway..busting for a pee when the devil wants ya soul. I do work in my diary's consciously as art like a reporter on my own emotional world..a performative private..and juvenile as much as anxious. its soild beligerant honest skidmark of designed overload from advertorial overlords of culture n media. diaries are in a sence ..a last stand of intimacy..to claim ya own mind media space at least to ya self..sayn.. "yo holly wood ...! stick it fella. this is my mind too ya know!"-but we always come crawling back dont we.

my myth of self. as characterised by stupidity SOUTHPARK SHUDDERING SOUTHERN GLOBAL IDENTITY SPASMS WHITE BOY ETHNO FEM GANGBANG IDENTITY SCHISM BOGAN TOXIC THRUSH PSYCHIC INFECTION BLUES - ADMITTING EMBARISDLY ITS MY ASSHOLE MUM !...IM A FEMINIST TOO.

and history's self-centred artist grandiosity as meek and subserviant as this cute coffee table read of authentic real crud..i offer. its organic yeah! digitally printed limited edition for your tall poppy spite and inhouse amusement. like to see yours...go on go on *AHHHHHTIST*. stepping up with my tony robbins on a txt dateing hookup. instant enlightenment. as disposable as consciousness...water air. but mmm its better than spreypainting "the enemy" lyrics in lyttleton convent walls ..and being hysterical as ya take lodging with the neighbourhood priest..wishing mr baxter was ya reincarnated bro fer paternal reality tokenism.-if only i was black..id have a better chip to weild .

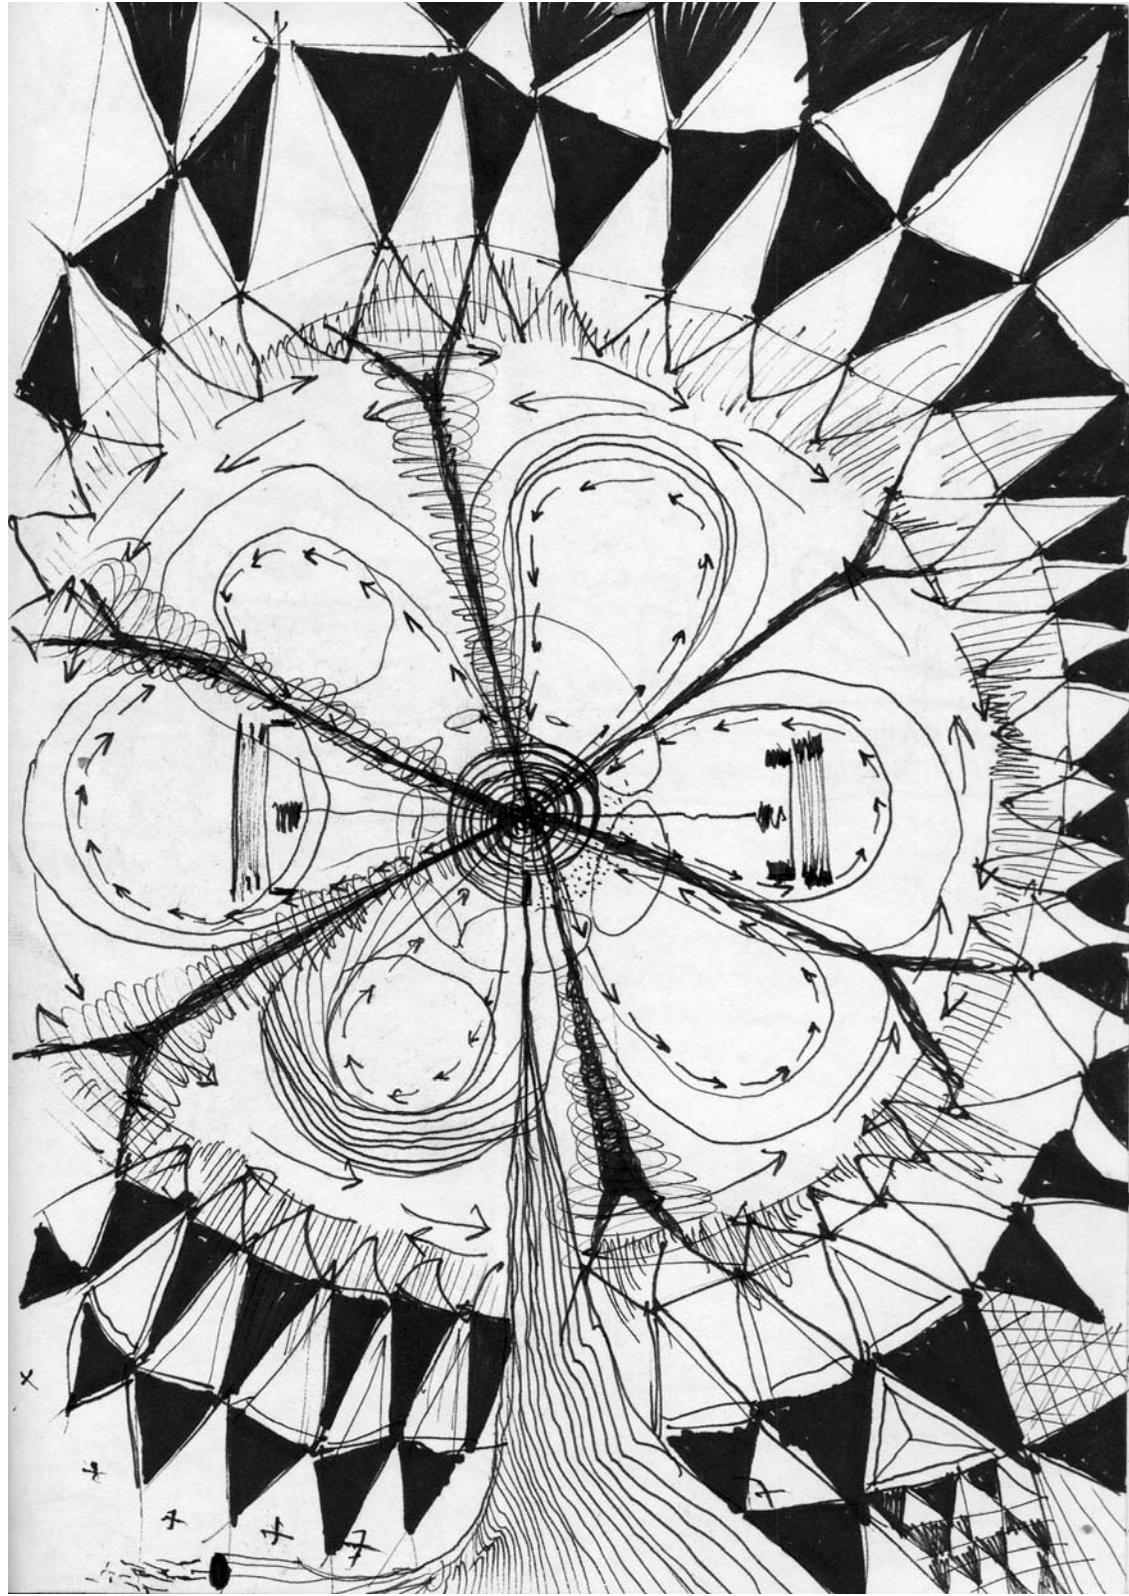

and when the waves of the outside are splashy I can always try and control stuff with a pen and a swearword! But often it's just a 3am In the morning inspiration note or a travel book doodle from one of my expulsions in solo styles attempting freedom or escape of experience..one of those bhuddist things about living in ya self with full responsibility n that...america fiji morrocco spain germany holland and britan were all imparted into the introverted missives. as well as big grandour of our southisland backcountry mountains and what not. spoze doodles are also footfalls to the chunkyer terrain of paintigs..both physically and psychologically. theres squashed sandfly in there somewhere im sure. do no harm wee fella. also graphic QI GONG NOTES from a chinese masters teacher training course in wellington i attended. unofficial james doodles done in th teachers "QI FIELD" of energy and information.

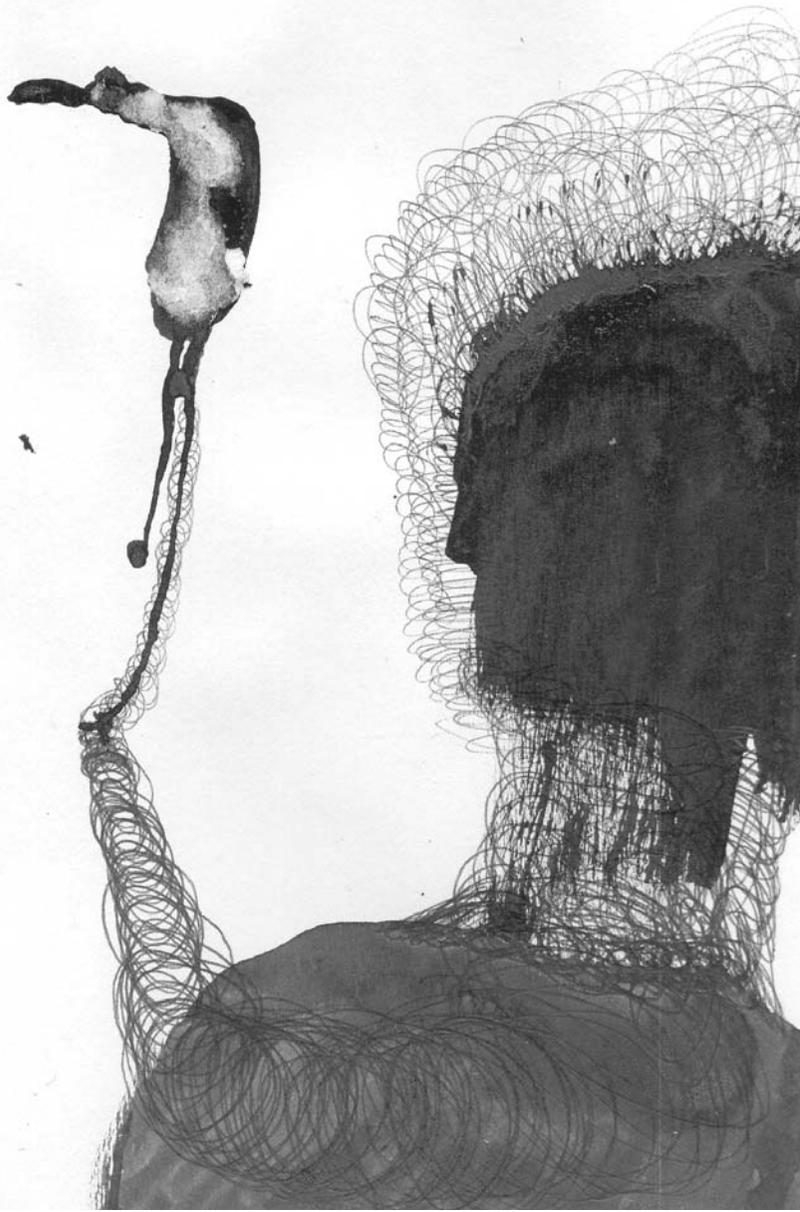

I love doodling! And think it's a under rated form that has nievety spoutinaity and a reassuring repeditive unfolding magic as well. just glad i had th cash and help makeing this publication so as to infect others..and by doing so..maybe we can value our own hidden corners as "ok" like a preyer..or a lapdance of approval rhetoric.. "why this need to be heard" .. "like-oh my ghod your like totally th best therapist i ever ever had dude..wait il just cut some more on my wrist"... and not realy scary or a big deal. you know..art born of terrable inadequesy and troubling self dought..as big as the grand canyon..8 mile baby. all the way to remuwer! whats up wellington cbd..! the fortunes and kindness of the new zealand art world are just increadable and its my pleasure..my *very pleasure* to add my wee cum rag of token hood weirdo to th melting pot of our favourite pacific island paradise..that we call home.

(id like to thank god..for being my best bitch.-the horns are tough tho )

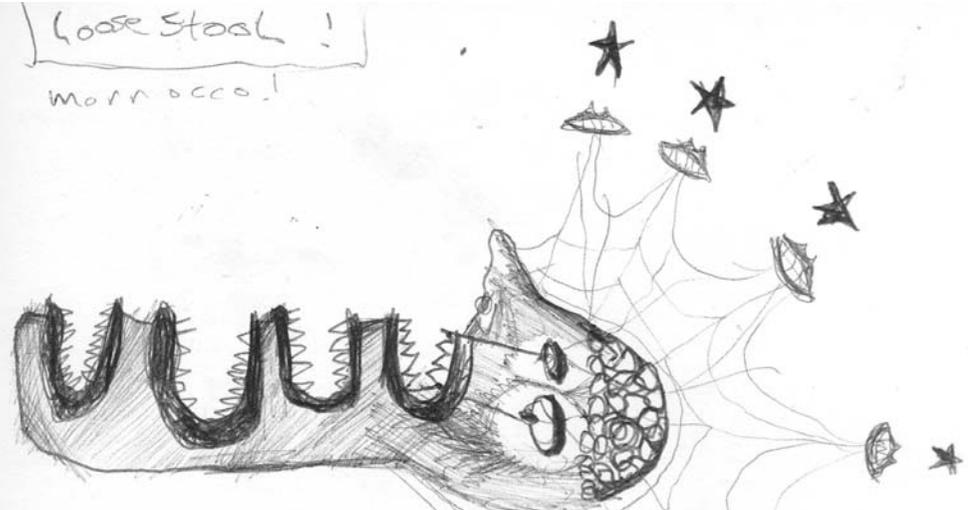

beast wishes...

So I wanted to say, The wind Rocks me in the hammock! The universe has a pause in Armageddon Age. The Age of transformation and chaos. we are being Broken and molded anew. Today we have the whole world in our psychic life never before and with it a panic and feeling of ineptitude in the face of the consumptive beast or a sense of shame and despair at global suicide of the species.

~~But there~~ or ignorance about Blinkered survival ... but underneath we all know our pure belonging our earth Right place of the planet. each of us although a flourishing decadent product of excess and in some cases mutant virus type special manifestation, we are nevertheless legitimate voyagers on indigenous spaceship earth!
